Projects

- Developed an enhanced platform for the Indian police helpline number 1930 to improve accessibility and efficiency for victims reporting incidents. The platform allows users to report crimes by sending messages or recording their voicing. Utilizing HTML, CSS, and JavaScript for the front-end, PHP for the back-end, and MySQL for the database, the system ensures secure and user-friendly interaction. This project aims to streamline the reporting process, providing quicker response times and better support for victims.
- Developed a comprehensive platform to enhance elderly care by providing access to doctors and home nurses, online diagnosis, and human resources such as caretakers and drivers. Utilized HTML, CSS, and JavaScript for the front-end, PHP for the back-end, and MySQL for the database. Streamlined appointment scheduling and medical consultations to improve support for elderly individuals.
